History:

This message has been forwarded.

Hi Rod-

Hey, it was good to run into you at the Barrier Workshop in Richland last week. Some interesting concepts and viewpoints.

I recently received an email from a person (Joanna Tippet) representing URS. She is requesting some information related to the Pasco Landfill Site (see below). I'm forwarding her email in the hopes that perhaps you may know of other EPA Superfund sites where this same information has been requested by the FDIC. Of course, we don't have a ROD for the Pasco Site, and nor do we have any estimates yet in place for the anticipated costs associated with final cleanup. This will be prepared in association with the ongoing Focused Feasibility Study analysis that is just getting started. Any information or perspectives you can provide to me before I respond to Ms. Tippet's request would be appreciated.

I also wanted to follow-up with you regarding your comment at the Workshop regarding a possible shift in EPA's involvement and information requirements related to the Pasco Landfill Site.

Please call me when you have a minute to discuss. I'm anticipating a site visit down to Pasco in the next month or so. As I mentioned to you at the Barrier Workshop, the MSW Landfill flare unit currently is undergoing some upgrades and component change-outs. Once those actions are completed, the SVE testing that was originally planned to start in January can commence. I'll contact you in advance of any upcoming visit, and perhaps we can connect for lunch, and/or make a quick stop at the site.

Thanks

Chuck

Subject: WA Superfund site inquiry

Mr. Gruenenfelder,

I am working on a project for the FDIC and one of the tasks is to collect cost estimates and number of corrective action/remediated sites in various states for various programs. I am working on Washington's Superfund sites now and while more have a ROD associated with them containing the necessary information, others do not.

The site in particular that I am inquiring about is the **PASCO LANDFILL NPL SITE, 1901 DIETRICH ROAD, PASCO, WA 99301**. I am looking for a cost estimate or **present worth cost** associated with the cleanup of this site, and the **NAICS code** associated to the site.

Thank you for your time,

Joanna Tippet
